Strategy: Buy on Weakness	
Resistance (1): 8,321	Support (1): 8,294
Resistance (2): 8,526	Support (2): 8,113

- **The Phisix surpassed its recent high of 8,321**, printing a fresh all-time high of 8,406 today but the 112-point gain made early on faded by closing time. We see a measured move of 8,526 for this swing. Supports are at 8,321, 8,294 & 8,113.
- **The Phisix is above the 10, 50 & 200-day MA.** The trend is up. The RSI is not confirming the move of the Phisix to new highs but the trend is still up. The immediate upswing is deemed to be intact as long as the Phisix stays above the 10-day MA.
- **The weekly chart shows that the Phisix broke out from a big sideways pattern.** The most important thing is that the breakout must be sustained. The recent rally has been mostly concentrated on the biggest stocks.
